TECNICAL DESCRIPTION

Smooth MicroCement is a colored cementitious layer, 1-2 mm thick. It may be applied over existing coatings, such as ceramic tiles, tiles and mosaics. It is a good-taste, quickly-applied and easy-to-maintain material.

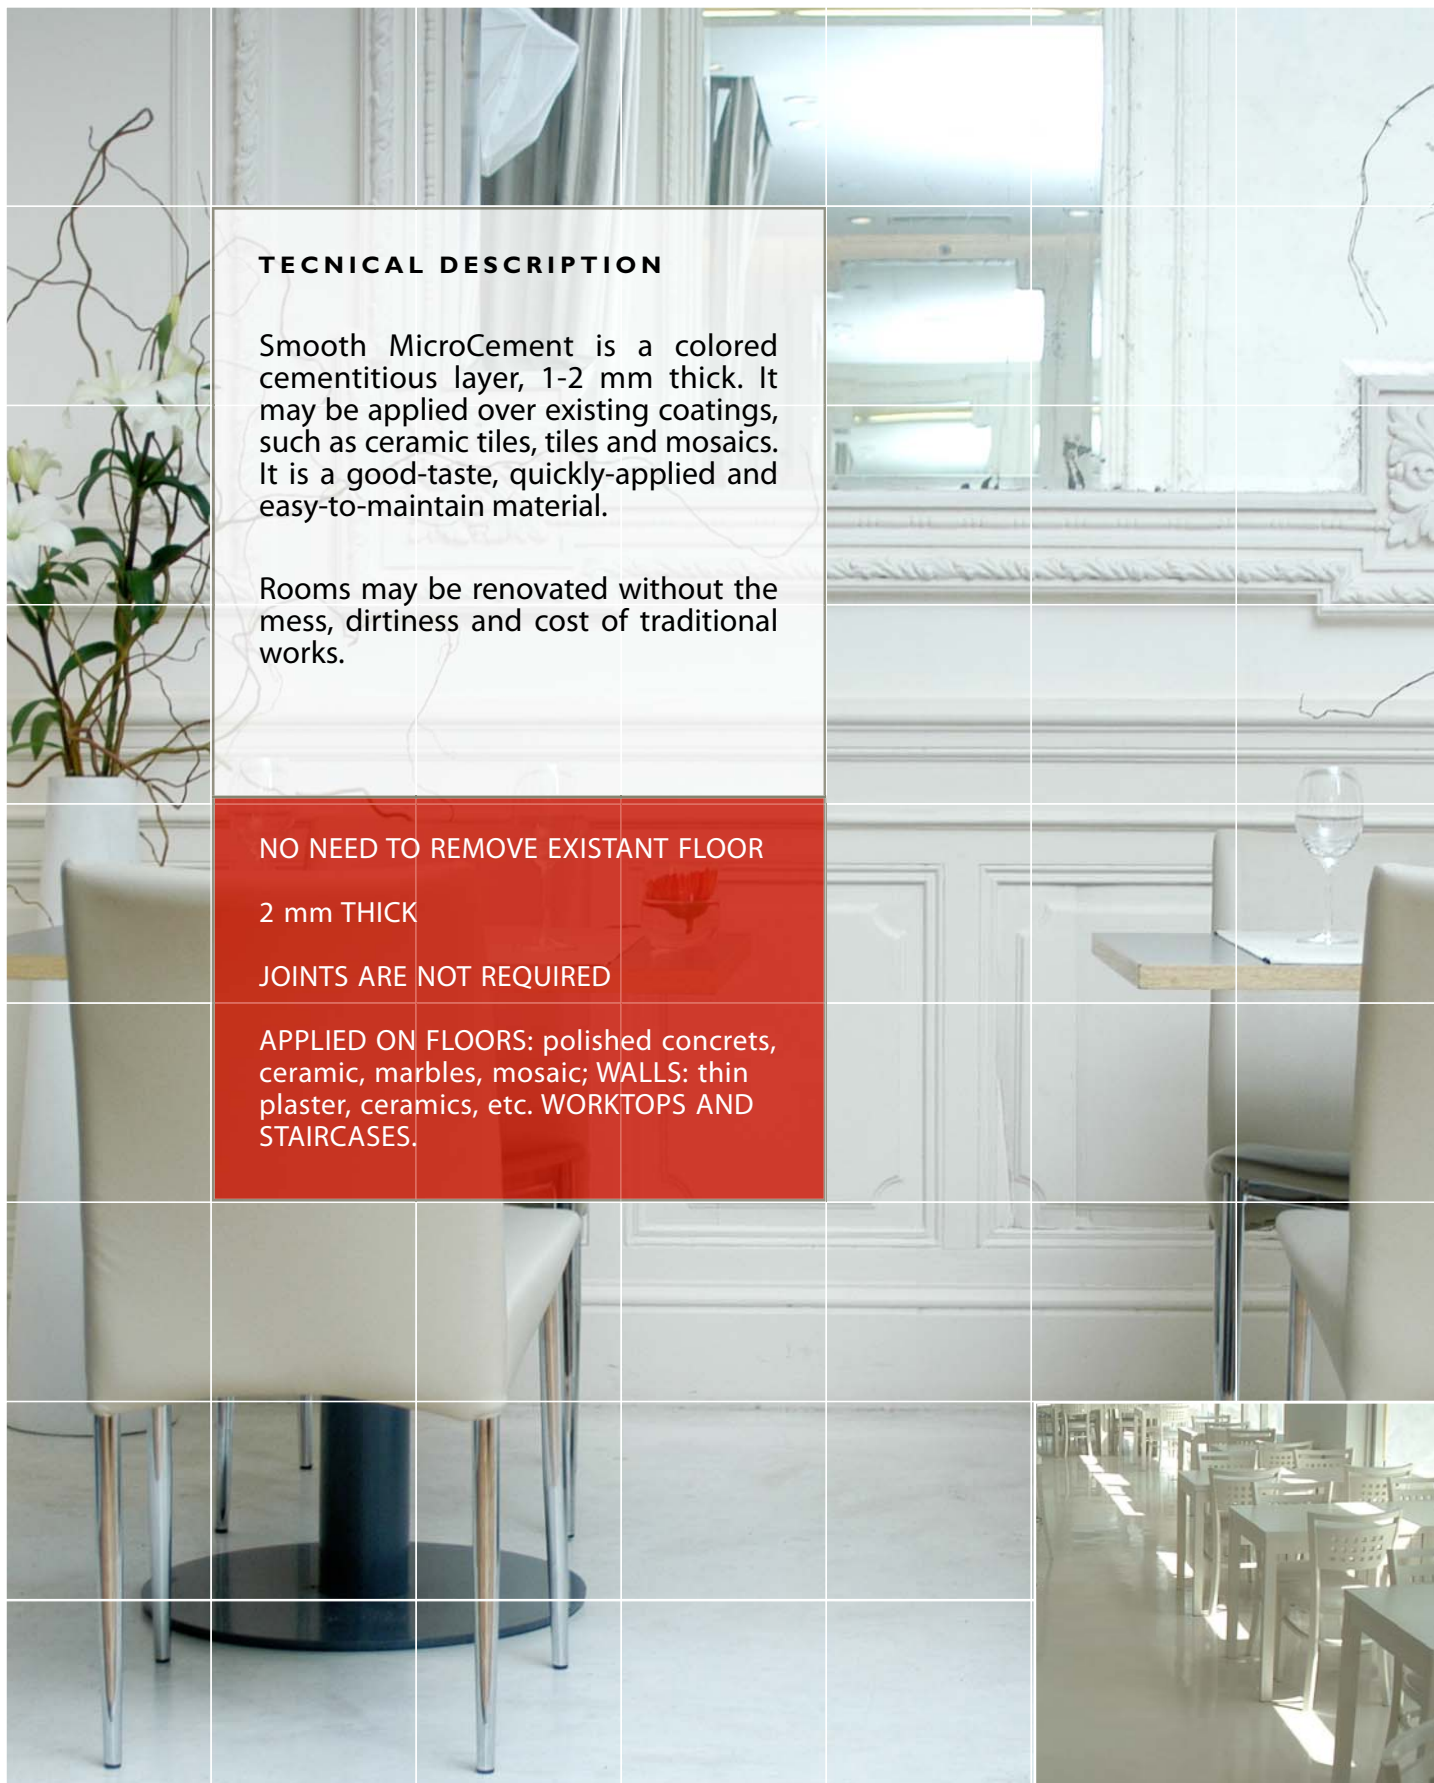

Rooms may be renovated without the mess, dirtiness and cost of traditional works.

NO NEED TO REMOVE EXISTANT FLOOR

2 mm THICK

JOINTS ARE NOT REQUIRED

APPLIED ON FLOORS: polished concrets, ceramic, marbles, mosaic; WALLS: thin plaster, ceramics, etc. WORKTOPS AND STAIRCASES.

CHARACTERISTICS

In most of the cases it can be applied on every surface.

It is used in interiors as in exteriors.

Interior Use: for bathroom, kitchen; offices, restaurants and stores.

Exterior Use: sidewalks, entrances, halls and galleries.

Microcemento is applied quickly -up to 50 m2 per day- with traffic cleared just a few hours after application.

+ CHARACTERISTICS

Quick Placement: up to 50 m2 per day.

No joints required to create your own designs.

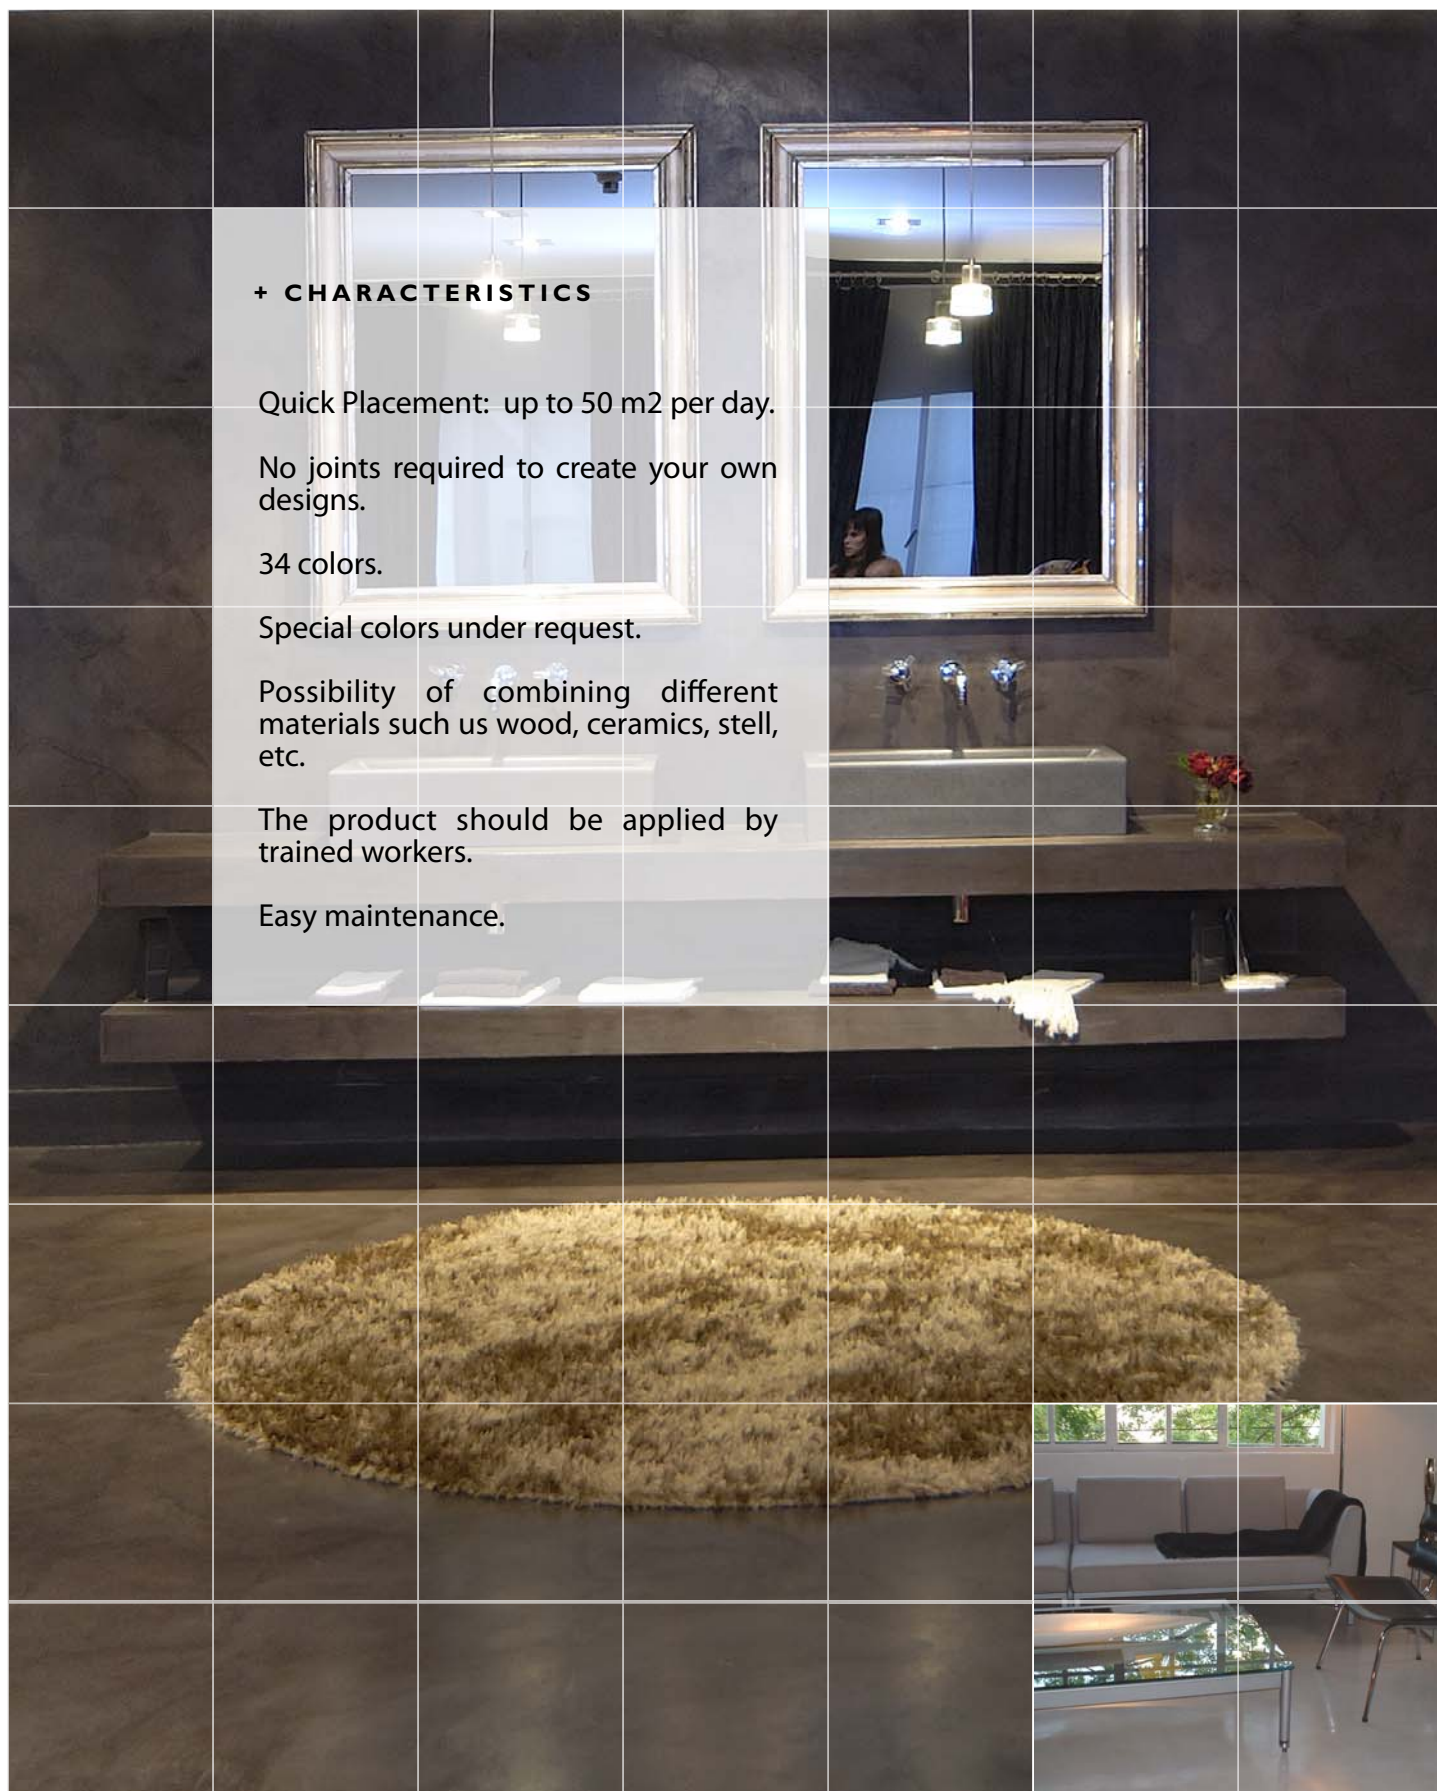

34 colors.

Special colors under request.

Possibility of combining different materials such as wood, ceramics, steel, etc.

The product should be applied by trained workers.

Easy maintenance.
